

## SOCIAL NETWORK

- A comprehensive suite of user capabilities and collaboration environments to generate resilience and sustainability
- Local community data/feedback collection and social/political mapping system (AI Based)
- Crowd sourced / activist / grass roots efforts incubation and support system, meeting spaces and locally focused education to support effective local action taking
- **Human network / node development**, organizing and support capabilities
- Support for local groups aggregation, reconciliation, facilitation and organization into sustainable communities. i.e. city, town, state and regional systems collaborative stakeholder reconciliation.
- **Integration of all local indigenous knowledge, wisdom and technologies in a grass roots manner into the central knowledgebase and ownership management and real-time remuneration system**
- **Biocultural protocols of ownership and contributor ship, value management and smart agreement chain in alignment with local cultures**
- Community building, (social, religious, natural and cultural), community conversation development support, local economy building, civic planning and support systems
- "Social callings, care & **meaning** not passions". **i.e. Focused stakeholder alignment generation and support systems** for people to effect their personal and collective noble purposes and evolve values together
- Local problems reporting and solutions implementation tracking
- Solutions and suggestions offered by local populations
- Local citizen vote collection system
- Local models and templates of green economies, governance, and ways of generating sustainability (reharmonization and reconnection with nature)
- Local solutions strategizing and creative ideas support system and rapid resource sharing
- Collective effort coordination, logistics support, reporting and project management
- Governance representation of the natural world and its species as equal to humanity in all decisions
- **Re-rooting younger generations to the natural world** and creating whole people as a result, and doing so **via technology** rather than technology disassociating humanity from nature
- Ground level re-organization of local and national systems into sustainability

## SEARCH ENGINE

- GDPR compliance management and all systems and data security management
- Access to all information related to climate crisis resolution on the platform & from affiliates

## UNIVERSAL KNOWLEDGE MANAGEMENT SYSTEM (UKMS)

- AI supported and collaboratively arrived at educational offerings
- Integrations to all of the world's universities and research feeds into AI engine
- Global transformation and climate crisis resolution decision-support information
- Equally available to all for free
- Recursive learning systems for global evolution of collective understandings
- New green jobs training and generator
- Indigenous knowledge collection and distribution system
- Educational support for synchronization of global transformational efforts
- Standard global educational certifications
- Learning Management Systems (LMS) Rapid crisis support information distribution
- Educational System incubators for the World's new educational system offerings (educational ecosystem)
- Digital asset management (DAM) and global info systems (GIS)
- UKMS + LMS + DAM + GIS with connections to all universities globally
- **AGI Incubation** (Artificial General Intelligence) and Governance System

### **ORGANIZATIONAL ARCHITECTURE DEVELOPMENT (Hub Design)**

- Interfaces connecting Individuals and organizations to generate aggregate global solutions resulting in evolving architectures and/or Infrastructures (GSA's)
- Architectural representations of collaborating organizations and institutions on the platform

### **PHYSICAL SAFETY MANAGEMENT**

- Food, water, energy and medical security, production, delivery and capacity building
- Supported by law enforcement and/or military in various conflict zones

### **SUBJECT MATTER EXPERT POOLS**

- Personnel/Team/Organizational resource and skill set databases and profiles
- Connection support for collaboration from resource pools
- HR management
- Accounting systems
- 6° down to zero

### **BLOCKCHAIN RECORDING**

- Cryptocurrency transactions
- Expertise bartering
- Micro-loans and accounting
- Smart agreement management support system from non-sustainable to sustainable
- Trust models design and support systems including knowledge and technology trusts
- Basic Universal Income (BUI) incubation, implementation and support systems

### **GREEN TECHNOLOGIES**

- ClimateScale Green house gas mitigation platform
- Social impact projects
- Entrepreneurial Incubators
- "Makers Movement" Incubators
- Waste management
- Pollution and plastics cleanup and replacement with sustainable products
- Recycling (a comprehensive model)
- Water reclamation and delivery
- Solutions development and deployment
- Solar, wind, water energy generation
- The whole Phoenix Platform will be designed to re-root and re-harmonize humanity with nature
- Rapid critical resource distribution systems and co-creation of green supply chains

### **BIOME PRESERVATION RENEWAL & RESTORATION**

- Agroecological architectures
- Indigenous people's AI and learning
- Green economy development systems

### **GLOBAL PROJECT MANAGEMENT**

- Globally scalable project management
- Synchronized information distribution
- Mapping team capacity and skills to projects
- Reliable sustainability support news and information
- Coordination and agreements support which interfaces with the smart agreements system
- Mapping of projects to ethical frameworks, trust models and agreements
- Globally synchronized coordination
- Full spectrum project bidding support, resourcing, initiation and launching system
- Comprehensive project history storage and reference

### **DATABASE MANAGEMENT**

- To support all collaboration and LMS & UKMS system functions
- Including independent user databases with interfaces to off-platform databases

### **COMMUNICATIONS**

- Inter-platform communication support system including social media and all other systems interfaces
- Extra-platform communications
- This includes interaction between databases internal to and external to the PHOENIX platform as well as a global communications support system between all collaborating entities

### **APPLICATION INTERFACES**

- Licensed access to: Office 365, Google Suite, Github and other Opensource Systems
- ChatGPT API's
- General API's
- Wiki-Engine interfaces to global communities
- AI Governance and Ethics systems

### **ADMINISTRATIVE MODERATION AND ORCHESTRATION**

- Multiple levels of orchestration and facilitation for networked entities and groups including:
- Network incubation, governmental institutions, organization, evolution and innovation
- Laws | Governance | Ethics | Monitoring | Proactive Learning and Evolution
- Coordinated interfaces to the world's militaries' and governmental entities supporting operations in concert with for-profit and non-profit organizations

### **COLLABORATIVE RELATIONSHIP EVOLUTION**

- Support for systems that generate and evolve collaboration globally, including organizational entities of all kinds and volunteers, i.e. Synchronized evolutionary murmuration. Initially via awareness of intersectionality
- Designing and cultivating cultures of giving, gratitude nurturance
- Bringing together 1.5 million climate crisis centric non-profit organizations, coalitions, networks and resources in functional collaborative union and funding and resourcing them centrally

### **MULTIPLE SUPPORTING / PARTNER AI'S**

- Global climate change data management
- Scenario projections
- Solutions prototyping and testing
- Mapping solutions to geological locations
- AI governance systems and ethical models
- AGI Incubator

### **WORLD LEADERSHIP EDUCATION**

- Shared intelligence and decision support
- Balanced education and inclusion of women in leadership
- Sustainability support education for leadership
- Local citizen micro-decision making support system
- Philanthropic donor education and decision-support system
- Support to organizing global infrastructure development initiatives

### **GLOBAL UNIFICATION**

- Mobilization, education, alignment and empowerment with a focus on women, youth and all diverse populations
- Grass roots engagements and social movements and networks development
- Local adaptive constituency/stakeholder based change and development models
- Volunteers/interns/paid employees
- Global coalition and network aggregation into a functional global coalition and resource sharing

## **IDEOLOGICAL AND SOCIAL HEALING**

- Cultural/religious/spiritual groups
- Global transformation
- Emotion management, relationship development, healing and reconciliation
- Scalable trust models
- Negotiation & moderation
- Mobilization and unification
- Generation of inclusivity, equality, mutual respect and substantive support

## **SOLUTIONS AND INNOVATIONS**

- Design, prototyping, generation, deployment of whole and transformational solutions
- Collaborative solutions incubator
- Collaborative network solutions generation
- Solutions aggregation into deployed strategic initiatives
- Life cycle solution management, monitoring and maintenance

## **GLOBAL VOTING SYSTEM**

- "Deep Democratic Model" multi-factor, multi-phase, multi-constituency voting system
- Problem reporting system
- Solutions recording system
- Evolution of voting constituencies feedback system
- Peaceful governance support to global transformation into sustainability
- New paradigm leadership development support system

## **GLOBAL LOGISTICS AND DISASTER RESPONSE/RECOVERY**

- Comprehensive world resource management
- Green supply chain development and curation with centralized project funding and donation management
- Deployment of solutions and resources
- Logistical coordination of change efforts (HUB)
- Managed disaster response and recovery
- Planned climate migration management, infrastructure & support systems

## **COLLABORATION INNOVATION ENGINE**

- Info-graphics based knowledge delivery system to and between collaborating teams
- Team development acceleration system
- Innovation acceleration support engine
- Ergonomic and wholistic systems design support systems
- AI-Based collaboration team coaching and mentoring system
- Solutions design, development and prototyping tools and softwares
- Collaborative murmuration support and alignment system
- Inter-team, organization and consortium collaboration support system
- Solutions development methodologies, documentation and prototyping tools
- Project management methodologies, documentation and support systems
- Optimized collaborative team communications support system
- Methodology / template / model recommendation and implementation support engine
- Digital twin collaboration support system
- Project focus and alignment system with sustainability, renewal and reharmonization with the earth, balancing power and contribution within teams
- Masculine and feminine harmonization and solutions approach translation system
- Co-evolutions with various indigenous systems & knowledge to generate whole sustainable solutions
- Evolution of collaborative team consciousness system (Spiral Dynamics values, chakras)
- Mental and emotional (including fear) construct transformation system
- Value evolution support system
- Project history reference and best practice recommendation system
- Collaboration incentivization models
- Trust model design and development support system
- Translation system between team participants and from each team to other teams & the world
