# About WSS

**World Systems Solutions** (WSS) is a 501c3 nonprofit organization whose vision is to unite, organize, mobilize and align humanity in common purpose to resolve the climate crisis through conscious collaboration and the best possible use of technology. Together as a worldwide collaborative community we will generate a sustainable future via intelligent application of technology, creativity and resources.

*At World Systems Solutions we believe that our mission, vision, and tenets are critical to creating a sustainable future for our planet, and are committed to accepting sponsorships only from organizations and individuals who align with our values. We are sincerely grateful for the collaborations and support that have brought us together to this moment, and are committed to working with aligned organizations and individuals who share our commitment to creating a sustainable future for all.*

## CERF Program

### The Climate-Regenerative Rolling Workshop Series

New collaborative and collective approaches are now required as we have less than five years to act decisively and on a global scale with cohesive systems, in perpetuity to solve the climate crisis. What humanity has been doing in a fragmented way to address the challenges has not adequately worked. No single organization, institution or government is going to move the needle on the climate crisis without diverse and widespread conscious collaboration.

It is time for humanity to foundationally change how we live in this world. We are bringing together high-level transdisciplinary representatives and global leaders to take collaborative actions to create solutions to solve the climate crisis. Representative groups of humanity need to be present in the conversations that will shape and architect support systems for our global future. In this environment, we engage these unique skill sets to creatively build new networks, frameworks and solutions to effect catalytic changes that can quickly and effectively balance the planet.

# CERF Program Objectives

## *What We Achieve Together:*

- 1** Recognition that we now need a global shift in consciousness, collaborative approach, solutions paradigm and AI-based platform technology to organize, develop and deliver crisis resolution solutions, resources and technologies that are available to all.
- 2** Workshop participants will help define the capacities required for the global community to generate scalable solutions to solve the climate crisis in the time available.
- 3** Workshop participants recognize the vital importance of their commitment to long-term collaboration with each other in order to generate the required scalable capacity between the world's stakeholders, networks and thought leaders.
- 4** Establish a prototype for climate crisis resolution workshops to be offered to the world in order to foster global collaboration.
- 5** Engage and unite high capacity, motivated workshop participants in lasting collaborative partnership with WSS for the building of the PHOENIX platform.

## **Collaboration** A New Structure and Model

Leveraging the expertise of seasoned facilitators, our workshops are structured to transform diverse dialogues into a unified roadmap for effective climate action "The Climate Emergency Response Forum (CERF) is uniquely tailored to create a sustainable, long-term operational structure of expanding, replicable, continued dialogue and systems development as a cohesive network committed to climate crisis resolve. We recognize that cohesive collaboration has been a missing piece in many global efforts. We are forging a path to not only identify solutions but to implement them widely. We truly believe that through this approach, we can make significant strides in resolving the Climate Crisis. For lasting global impact, we need a new collaborative framework. Imagine organizations dedicating teams for a united goal of climate resolution. We call on organizations to be steadfast contributors to a global climate action network to be integral threads in a persistent global tapestry dedicated to collaborative climate action.

# Capacities in Development

## From Recent CERF Workshops:

### **Collaboration Innovation Engine:**

Revolutionizing team operations with an info-graphics based knowledge delivery system, AI-based team coaching, and ergonomic design supports. It fosters synchronized efforts, integrates indigenous wisdom, and promotes a transformative approach to global sustainability projects.

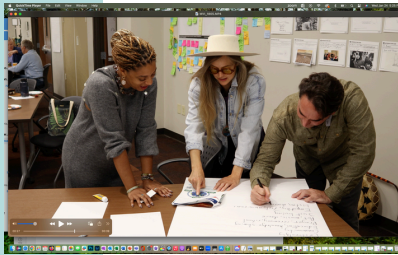

### **Universal Knowledge Management System (UKMS):**

A groundbreaking educational framework integrating AI, diverse knowledge systems, and global accessibility. It focuses on sustainable development, inclusive learning, and adaptive content, crucial for a globally interconnected, AI-enhanced educational ecosystem.

### **Global Logistics and Disaster Response and Recovery System:**

A robust platform combining a Global Resilience Network, Green Innovations, and Integral Resilience Technologies for efficient disaster response. Emphasizing security, inclusivity, and proactive resource management, it embodies a community-centric approach to crisis management.

### **Ideological and Social Healing System:**

A comprehensive solution fostering global healing and unity, integrating technology with human-centric approaches. This system challenges traditional power dynamics, promotes global responsibility, and nurtures emotional and spiritual well-being for a more interconnected world.

### **Green Tech, Regeneration, and Solutions Engine:**

Catalyzes sustainable technologies, ecological restoration, and innovative solutions. It spans from green tech incubators to biome preservation, focusing on sustainable product development, renewable energy, and global connectivity. It's a cornerstone for ecological and technological harmony.

Each function represents a facet of our comprehensive strategy to address climate change and interrelated crises, showcasing our commitment to innovative, sustainable, and holistic solutions. Your support can help scale these initiatives, creating a lasting impact on global environmental and social well-being.

## What Attendees Say:

- *"It's revolutionary to be able to see all of these magnificent people that have come from worldwide, and I'm grateful to be a part of it."* - Raamen
- *"Hope without results is nothing. The idea of this whole thing is collaboration. Climate change is going to affect everywhere on the globe."* - Rob
- *"I trust that there's an infrastructure in place that will keep checking in, and that there's a level of accountability so that we can keep this fire going."* - Temple
- *"We encouraged each other to think differently; to reimagine new values, new systems and new technologies, but based on inclusive innovation and growth for the sake and benefit of the whole."* - Aunkh
- *"I truly believe this is an organization to get involved with; they have an amazing staff, board and facilitation team; an org you definitely want to get involved with around climate change and the activation of future solutions."* - Angel
- *"The most impactful thing that I've found, (at CERF) coming from very diverse backgrounds, cultures, ideas and walks of life, we found common ground about the environmental issues we want to tackle; about concrete solutions creation and delivery proposals. All of this is going to be truly significant for the world that WSS is doing."* - Nicolas

# The Urgency of the Climate Crisis

Global average temperatures are estimated to reach the point of no return by 2030. With billions of species and half of the world's children at severe risk, relying on government and big business alone to solve climate change is a gamble we can't afford to take. World Systems Solutions focuses on the inner causes of the climate crises from the unconscious choices humanity has made in the past. Our position is that real solutions to the climate crisis can only be achieved through conscious collaboration.

## PHOENIX World Transformation Platform

World Systems Solutions has a complete, factual, practical strategy and blueprint for collaboratively resolving many interrelated global crises right now:

- Create fully green sustainable jobs through youth, women and diversity empowerment and transformational education.
- Utilize the PHOENIX platform, workshops, collaboration systems and education to proactively generate and orchestrate the delivery of global-scale climate solutions by synergizing consortiums of nations, organizations, universities, research institutes and many crowd sourced initiatives with all of their technologies and resources.
- Continue to design and build PHOENIX, an A.I. driven international collaboration platform, social re-engineering and solutions generation engine for healthy global transformation, along with other climate crisis organizations and global NGOs.
- Implement PHOENIX globally, making it free to all nations and peoples and communicating its necessity, capacities, potentials and benefits to reverse the climate crisis.
- Leverage the pressures all nations feel from the climate crisis to impel them into necessary and well-organized action steps, collaboratively working together using PHOENIX and other CORE programs to resolve the emergencies facing the planet.
- Through the PHOENIX platform, monitor and adaptively learn from each project and implemented solution to transform global human life processes into sustainability and harmony within our planetary ecosystem.

## Sponsorship Policy

To ensure sponsorships align with our mission, we will evaluate opportunities based on the following criteria:

- **Mission Alignment:** Sponsors must share our dedication to solving climate change and building a sustainable future.
- **Ethical Values:** We partner with sponsors committed to environmental sustainability, human rights, and social justice.
- **Collaboration:** We value sponsors who work with us in a respectful, non-competitive manner. We emphasize a collaborative spirit.
- **Unconditional Love & Service:** We prioritize sponsors dedicated to positive global impact through love and service.
- **Non-Endorsement:** Sponsorship for the CERF Program does not necessarily imply endorsement of the sponsor's organization.

*Thank you for your consideration and collaboration!*

# Sponsorship Options

We are engaging with those who are committed to a new global paradigm of service to humanity and the natural world. Supporting these high-capacity collaborative sessions will offer you the opportunity to make a significant impact in resolving the climate crisis and help to generate a sustainable global future via intelligent application of technology and resources. We thank you in advance for your generosity and support.

---

## Climate Vanguard | \$100,000 and above

Prominent logo display in pre- and post-program slideshows ~ Exclusive meetings with WSS strategic staff for insights and collaboration on PHOENIX Systems Design ~ Special acknowledgment during the forum ~ Prime placement on digital platforms, event pages, and communications. Highlight as the main Program Sponsor in post-event recaps, with a link and logo in post descriptions ~ Opportunity for a 5-minute address or video feature during one of the forums.

## Global Guardian | \$50,001 to \$99,000

Logo display in pre- and post-program slideshows ~ Three strategic meetings with WSS staff for collaboration on PHOENIX Systems Design ~ Comprehensive logo and link placement on digital event platforms and communications ~ Mention as a key Program Sponsor in post-event recaps ~ Opportunity for a 3-minute address during one of the forums

## Earth Steward | \$20,001 to \$50,000

Logo displayed in the pre-program slideshow ~ Two strategic meetings with WSS staff. Digital print acknowledgment in forum marketing ~ Logo and link on the program series website page ~ Mention in select forum's digital programs or booklets ~ Social media acknowledgment as an Earth Steward for the program series

## Eco Ally | \$5,001 to \$20,000

Logo displayed in the pre-program slideshow for one forum ~ Acknowledgment and thank you during the specific forum ~ Logo and link on the website's event page for one forum ~ Mention in the forum's digital program or booklet ~ Social media acknowledgment as an Eco Ally of the program series

## Eco Supporter | Up to \$5,000

Logo displayed in the pre-program slideshow for one forum ~ Thank-you note in the digital program or booklet for the specific forum
